

## HOW DEMONS GET IN

Demons get into the human brain

They make normal people go insane.

Like Stephan Paddock

Who went on a shooting spree

People think its guns

Yes, but it starts with demons we can't see.

They get in our minds through drugs, alcohol and greed.

A lot of humans don't know where

A certain thought began.

Those voices they are hearing

Are from Satan's hellish land.

That these demons are an invisible

Force recruiting people to the dark side

Even horror movies tell it all.

A demon dressed in a clown suite is not cute

Stephen King channeled hell which is real---

Only people can't see it for it's in another realm.

But humans don't understand

That these demons are an invisible Force

Recruiting people to the dark side

Like black magic of course—

All evil institutions like the Klu Klux Klan

Even Charles Manson had demons command

Him to make people kill--

In his self defense...

"I didn't pull the gun"

You don't need a gun to kill someone.

All you need is a voodoo doll

Who is a curse even if its small.

People say "it is all make believe"

Don't let demons get you deceived.
